

# Roubideau Creek Segment 1

## Eligibility Report Information:

- Classification: Wild
- ORV: Recreational (non-mechanized), Wildlife (leopard frog, bighorn sheep), Cultural (inscription panel, rock art), Vegetation (~~Fremont cottonwood/skunkbush sumac~~ riparian woodland; skunkbush sumac/sandbar willow riparian shrubland)
- Segment length: 10.74 miles; 93% BLM

## Stakeholder comments & questions on BLM information:

- How do those landowners feel about the potential for their part of the stream to be determined “suitable” for Wild & Scenic status?
  - Wanda Boyd requests her land be removed from any Wild and Scenic consideration.
- Is there a chunk of private land in the middle of the segment as well? *No – BLM verifies*
- Would BLM seek to swap or acquire private land on a segment if it was determined suitable? Yes per BLM
- Vegetation ORV Fremont Cottonwood/skunkbush removed per BLM update
- Subgroup agreed on the conditions needed to be maintained in the stream corridor, but did not come to agreement on what management tools should be applied to maintain these conditions.

	ORV Needs	Current Uses & Values	Potential Future Uses	Current Problems/ Assets	Policy/Mgmt tools – options and impact
1	Wildness	<ul style="list-style-type: none"> <li>• Hunting</li> <li>• Fishing</li> <li>• Hiking</li> </ul>			Within Camelback Wilderness Study Area (WSA): <ul style="list-style-type: none"> <li>• Provides surface disturbance protection.</li> <li>• Does not provide protection specifically for ORV's.</li> <li>• BLM found “not suitable” for designation as Wilderness; no process for revising.</li> </ul>
2	Flows	Large diversion upstream.		Sometimes stream goes dry in places.	
	Habitat quality			Russian knapweed problem (most severe among Monitor, Potter & Roubideau).	BLM spraying done on horseback because of WSA restrictions.
3	Cultural preservation				Nominated for National Register of Historic Places ( <i>would require that any federal or federally funded project take into account potential impacts to places deemed eligible to be on the NRHP &amp; give opportunity to comment by the Advisory Council on Historic Preservation</i> ).
4		Access Roads		Main road up Roubideau terminates for public use just up from the confluence; good condition.	
5		Grazing
